Rank: 966823 | Points: 28/50

Tweet

You are now 22 points away from the 2nd star for your java badge.

## Try the next challenge | Try a Random Challenge

Problem Submissions Leaderboard Editorial 🖰

In this challenge, you must read an integer, a double, and a String from stdin, then print the values according to the instructions in the Output Format section below. To make the problem a little easier, a portion of the code is provided for you in the editor.

**Note:** We recommend completing Java Stdin and Stdout I before attempting this challenge.

#### **Input Format**

There are three lines of input:

- 1. The first line contains an integer.
- 2. The second line contains a double.
- 3. The third line contains a String.

#### **Output Format**

There are three lines of output:

- 1. On the first line, print String: followed by the unaltered String read from stdin.
- 2. On the second line, print Double: followed by the unaltered double read from stdin.
- 3. On the third line, print Int: followed by the unaltered integer read from stdin.

To make the problem easier, a portion of the code is already provided in the editor.

**Note:** If you use the nextLine() method immediately following the nextInt() method, recall that nextInt() reads integer tokens; because of this, the last newline character for that line of integer input is still queued in the input buffer and the next nextLine() will be reading the remainder of the integer line (which is empty).

### Sample Input

42

Welcome to HackerRank's Java tutorials!

### Sample Output

String: Welcome to HackerRank's Java tutorials!

Double: 3.1415

Int: 42

You have earned 10.00 points!

You are now 22 points away from the 2nd star for your java badge. 12% 28/50
